## Our Mission

- To shape a healthier future for everyone
- To build a community of aspirational future ready learners, who are motivated to explore, create, and innovate.
- To provide a creative and inspirational virtual curriculum available ON DEMAND in the classroom and for home learning.
- To connect students to inspirational experts and young entrepreneurial role models via our weekly broadcasts.

## What is the KC Classroom?

The KC Classroom is an online enrichment experience that focuses on health, wellbeing, and education to inspire an awesome career in the food industry. We host 6 missions every year exploring real world projects and learners can journey through each mission by participating in weekly broadcasts with young role models, businesses and innovators and choose from 18 different challenges to complete as scientists, engineers, artists, digital makers, creatives, and entrepreneurs.

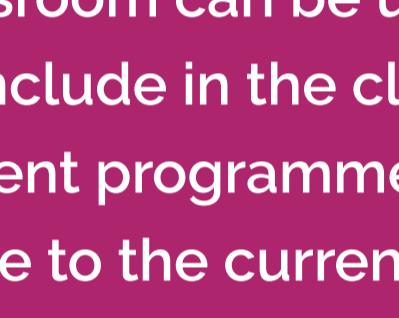

## A flexible curriculum

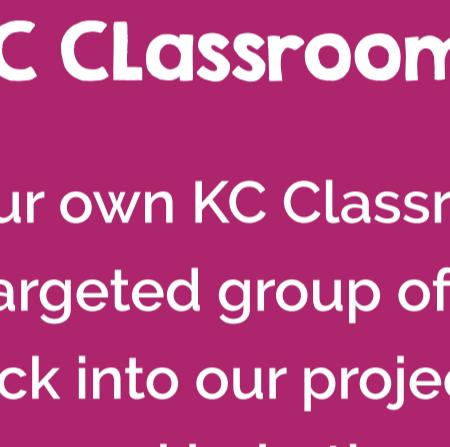

### Careers & Phse

The KC Classroom can be used in careers programmes to widen aspirations and help Careers Leaders to meet Gatsby benchmark 5. PHSE Leaders can also make use of our broadcasts in form time slots. What a great way to start the day!

### Flexibility

The KC Classroom can be used in a variety of ways to include in the classroom, as an enrichment programme and home learning. Due to the current restrictions in delivering practical lessons you can inspire your students with real world projects to inspire young people to realise their potential beyond education and empower a generation to live and work well. We also have created printable challenge workbooks for schools that are teaching whole year groups at the same time and with limited access to ICT.

### The KC Classroom Club

Start your own KC Classroom club with a targeted group of students. Get stuck into our project-based challenges and help them to build a portfolio of #futureready skills, projects, and experiences. As our resources are available on demand you can host your club at any time of the day or even virtually.

## How does it work?
